

UNIVERSITY OF CALIFORNIA AT LOS ANGELES
General Education Cluster Program
Neuroscience
EXAM 1

100 POINTS

GE Cluster 73B: Neuroscience
Winter, 2022

SHORT ANSWER Questions.

Short answer-10pts each: Please keep your answers brief and to the point! Content AND communication are critical to your answer. Do NOT cut and paste the question into your answers! Points will be deducted if you do that!!!

1. Explain why mentally ill patients were “deinstitutionalized” from state psychiatric hospitals in the 1960s and 1970s and what the results have been.
2. Explain what the “recovery movement” of the late 20th-early 21st century proposes as the best treatment for the mentally ill, including a couple of specific examples, and why it may not be the best treatment for all mental health clients.
3. Imagine that you are a doctor evaluating a patient (Mr. Smith) who is complaining of memory problems. What factors would help you determine whether Mr. Smith has amnesia or Alzheimer’s disease?
4. What are the three classes of symptoms of schizophrenia- give two examples of each
5. In the video shown in class, Kat Napiorkowska depicted someone suffering from depression. What were some of the symptoms she depicted?
6. What are some of the important factors in effective encoding declarative memory?
